AMERICAN DREAM

Coalition for the American Dream Statement on Denham Resolution

The Coalition for the American Dream, an organization of business leaders representing every major sector of the US economy, endorses the House resolution introduced by Rep. Denham (H. Res. 774), which would require the House to vote on several immigration proposals related to DACA.

It is vital that Congress act now to provide legal certainty for Dreamers and businesses, avoid a loss of valuable talent and significant disruptions in the American workforce, and ensure that these deserving young people can continue contributing to their communities and our economy.

President Trump has called for Congress to act on DACA, and a debate in the House on this important issue is long overdue. We applaud Rep. Denham for his work, and urge members to support his resolution.
